

JOB OFFER

Position in the project:	Metabolomics Technician
Scientific discipline:	Metabolomics, Mass Spectrometry, Medical Diagnosis
Job type (employment contract/stipend):	Full employment contract
Number of job offers:	1
Remuneration/stipend amount/month (*X0 000 PLN of full remuneration cost, i.e. expected net salary at X 000 PLN*):	2 600PLN netto
Position starts on:	01.11.2017
Maximum period of contract/stipend agreement:	36 months (plus possible extension for another 24 months after positive assessment of grant progress)
Institution:	Institute of Biochemistry and Biophysics - PAS
Project leader:	Prof. hab. Dr. Michal Dadlez
Project title:	Mass Spectrometry of Biopharmaceuticals - improved methodologies for qualitative, quantitative and structural characterization of drugs, proteinaceous drug targets and diagnostic molecules. <i>Project is carried out within the Team Tech Core Facility programme of the Foundation for Polish Science</i>
Project description:	Mass Spectrometry (MS) expands into almost every area that requires qualitative and quantitative analysis of small molecules, including clinical applications. Its advantages include unsurpassed specificity, sensitivity better than most other analytical techniques, and ability to multiplex the analysis of many compounds in one analytical run. Since 2001 MS Lab IBB serves as a core MS laboratory for the community of biomedical sciences, implementing a variety of proteomic/metabolomic analyses for research groups from >70 institutions worldwide, both from academia and biopharma industry. It also provides immunosuppressive drug monitoring service for Polish transplant patients. We collaborate with numerous research groups from Poland and abroad, work out new data analysis tools and train students. Present project aims at improvements in analytical capabilities of the Lab and implementation of new procedures that will increase the scope of Lab activities or increase the results quality. We also plan enhanced cooperation, within the framework of mutual work support with pharmaceutical industry.
Key responsibilities include:	<ol style="list-style-type: none"> 1. Development and validation of LC-MS/MS and analytical methods. 2. Authorization of medical diagnosis testes. 3. Analyzing and interpretation of diagnostic tests. 4. Supervision of procedures and documentation. 5. Maintaining instruments. 6. Developing SOP's.
Profile of candidates/requirements:	<ol style="list-style-type: none"> 1. MSc degree in Medical Laboratory Science, or equivalent. With current license to practice as Medical Diagnostician in Poland. 2. At least 6 years of experience in MS laboratory. 3. Experience in metabolomics research, monitored drug therapy, and pharmacokinetics study. 4. Experience in developing and validation of LC-MS/MS protocols.

	<ol style="list-style-type: none"> 5. Experience in metabolomics and analytical procedures as SPE and LLE. 6. Knowledge of MassLynx and MetaboLynx. 7. Experience in QC in medical lab. 8. Participation in metabolomics projects. 9. Publication in journals included in JCR list.
Required documents:	<ol style="list-style-type: none"> 1. Curriculum Vitae; including publication list 2. Current license to practice as Medical Diagnostician.
We offer:	Full time employment as a technician.
Please submit the following documents to:	m.glowacka@ibb.waw.pl
Application deadline:	25.10.2017
